## International Forum on Digital and Democracy

IFDaD 2022 // Second edition

17 ~ 18 November 2022 // Rome and online event on [ifdad.org](https://ifdad.org)

The conference aims to be a meeting place between politics and academics a moment of confrontation, promoting international collaboration in the exchange of information, ideas and good practices.

Since the first edition of the Forum, in December 2020, the stretching of pandemic control measures constrained furthermore individual freedoms. In some cases, it provided legitimacy to authoritarian shift in frail democratic governance. According to **Democracy Index** in 2021 global democracy continued its decline and experienced its biggest annual drop since 2010 after the global financial crisis. Whereas even the United States, the stronghold of democracy, in occasion of the Capitol attack, showed to be unshielded to the outburst of illiberal forces.

For fragile democracies difficult times lie ahead. However, if the spirit of democracy and its needs remains strong among people, recovery hopes are also to be placed in the righteous use of digital technologies.

The expected outcome of the Forum is to gain a greater understanding and shared view on how digital technologies can positively affect electoral process and pluralism. As a follow-up of the debate of the first edition, the Forum will explore and develop the interplay between digital technology and data, political participation, and governance. Altogether with two additional focus: the functioning of eGovernment and disinformation.

### INVITED SPEAKERS:

**Romano Prodi // VP EU // Jeffrey Sachs // UNESCO // ONU**

## TOPICS of INTEREST:

Internet and algorithms caused a transformation of the centennials democratic processes. When exploited for political purposes digital tools affect the functioning of institutions created to evolve at human speed and not at the exponential pace and massive scale of digital technologies.

In the effort to gain a better understanding on how democracy can be strengthened in an era of rapid technological changes, the Forum engages scholars and experts in a Call for Papers on one of the following areas:

### 1) Technology plays a major role in shaping the political landscape.

How technology can be positively deployed to underpin political institutions.

How can an equitable access to technology be ensured?

How *can* digital *technology* encourage greater engagement in civil society?

### 2) Centralized control from the public administration software/data represents a dominant power which could lead to abuse people's live scrutiny: from Surveillance Capitalism (GAFA) to Surveillance eGovernment.

How should eGovernment systems be designed and built to be compliant to democratic principles.

Can well-designed digital tools enhance liberal values and build up civic participation?

What possible organizational and procedural oversight and accountability measures should be envisioned?

### 3) Technology-fueled disinformation has toxic societal impact on democratic political culture, providing severe polarization which damages all institutions essential to democracy.

Are social media to be considered a private space or a public service?

How to fine tune them to secure free and confidential communications?

Does content moderation affect freedom of expression?

Can online moderation of social platforms improve the wellness of digital communities?

## SUBMISSION AND REVIEW PROCESS:

The aim of the FORUM is to investigate the role of digitalization in democratic processes.

Proposals will be reviewed single-blind and do not need to be anonymized before submission.

Proposals have a length of no more than 10 pages in the Lecture Notes in Computer Science (LNCS) proceedings template. Proposals can be selected to be presented to the conference either as oral presentation or poster presentation.

The submissions to this special session must be made via the **EasyChair conference system**

All submissions must be written in English. Authors should select one among the four tracks when submitting. The 1st International Forum on Digital and Democracy will solicit position paper proposals for the above tracks.

## IMPORTANT DATES

Paper submission deadline: July 31<sup>st</sup>, 2022

Notification: October 15<sup>th</sup>, 2022

Camera-ready: November 1<sup>st</sup>, 2022

## GUIDELINES FOR CHANGES TO TITLES // AUTHORS AFTER SUBMISSIONS
